How to fill in your LAB Voucher

Every VET-LAB kit includes a LAB Voucher. Fill it in and put it in the bag with your sample. It tells us whose sample it is and where to send the results.

1 **Order number**
Bought on our website? Write your order number from your order confirmation email. **This is important:** make sure you use the order number from your email confirmation, starting with # (for example #3087).
Bought on eBay? Just write **eBay**.

2 **Date sampled**
Write the date you collected the sample.

3 **Animal species**
Tick the type of animal the sample is from.

4 **Type of test**
Tick the test you ordered. For most kits this is the **Standard Worm Egg Count**.

5 **Your details**
Write your name and your **email address**. Print clearly and check every letter, dot and @. One wrong character and your results can't reach you.

6 **Animal names**
Turn the voucher over and write the **name of each animal** in the Animal Name column, one per row.

7 **Pack and post**
Put the voucher in the bag **with your sample**, seal it, and post it **Monday to Wednesday**.

Getting your results

Your results will be uploaded to your VET-LAB account, where you can view them by clicking the **Open Lab Results** button. We recommend registering an account (it takes 1 minute and is free) at **www.vet-lab.co.uk/my-account**. If you don't have an account, your results will be emailed to you.
